Re: Transmittal of Supplemental Work Plan for the Fenton's
Reagent testing, L.E. Carpenter Superfund Site,
Wharton, New Jersey

Dear Ms. Zervas:

In my letter of October 6, 2000, I mentioned I was waiting on an approval from either Ada, Oklahoma, or from another site's Potential Responsible Parties (PRPs), in order to send you a work plan for the Fenton's Reagent testing, that might be used to supplement efforts being considered at the L. E. Carpenter site. Please note that the Ewan site's PRPs' have given permission for the use of the work plan they had previously submitted to the United States Environmental Protection Agency (EPA), and two copies of this plan are enclosed. I hope you find it helpful.

Once again, thank you for the opportunity to review and provide comments on this document. Please feel free to contact me to discuss this matter further at (212) 637-4411.

Yours truly,

Stephen Cipot, Remedial Project Manager
Southern New Jersey Remediation Section
